Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1, 5, and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lorenzini in view of Best.

Lorenzini discloses the use of a mouthpiece, barrel and reed table comprising: a body having a mouthpiece and barrel section having at least circular bores for supporting a wind instrument barrel and circular extensions for supporting a wind instrument mouthpiece and having a reed table section (see figures 2 and 3). Lorenzini does not disclose the use of a tray portion having a reed area.

Best discloses the use of a container for reeds with a tray portion having a reed area (see figure 5).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the device as disclosed by Lorenzini to include the tray as disclosed by Best in order to provide a convenient display device for wind instruments.

3. Claims 2-4 and 7-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
